

WHAT TO EXPECT: LASER GENESIS

Laser genesis is a non-invasive laser treatment used for skin rejuvenation.

KEY BENEFITS: improves skin texture, reduces redness, and promotes collagen production

BEFORE YOUR TREATMENT:

- Avoid tanning or spray tanning.

DURING THE PROCEDURE:

- We'll take before photos and your skin will be cleansed.
- Goggles or eye shields will be applied to protect your eyes.
- The pulses feel generally warm but not painful.
- When complete – post procedure creams will be applied

POST PROCEDURE:

- You may experience a sunburn-like redness and warmth that can last for 12-24 hours.
- It is important to avoid cooling your skin after the treatment, so we don't recommend using cold packs.
